Art Unit: 1625

Applicant's arguments with respect to claims 26, 28, 40, and 42 have been considered but are moot in view of the new ground(s) of rejection.

The Status of Claims:

Claims 26, 28, 40, and 42 are pending.

Claims 26, 28, 40, and 42 are rejected.

DETAILED ACTION

1. Claims 26, 28, 40, and 42 are under consideration in this Office Action.

Priority

2. It is noted that this application is a 371 of PCT/US04/24308 (07/27/04), which has a priority document, USA 60490588(07/28/2003).

Drawings

3. None.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151

Art Unit: 1625

U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 42 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 25 of prior U.S. Patent No. 11/748,096. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26, 28, 40, and 42 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over

Art Unit: 1625

claims 1-2,4,10-18,24,25,28 of copending Application No. 11/748,096. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the relationship between the genus and the species.

The claims 1 and 25 of copending Application No. 11/748,096 is described below:

1. (Currently Amended) A compound of formula (I):

, and

4-[(4-Hydroxyphenyl)(3,3,5,5-tetramethylcyclohexylidene) methyl]benzoic acid

,

whereas the claim 26 of the instant invention is shown below:

Art Unit: 1625

26. (Currently Amended) A compound of the formula

~~or a pharmaceutically acceptable salt thereof including salts, solvates, and pharmacologically functional derivatives thereof.~~

However, the instant invention differs from the copending application in that the claims of the co-pending application have the compounds with a broad genus, whereas the claims of the instant invention is a single species of the claimed compound.

Even so, claim 25 discloses the same compound as the instantly claimed compound and the rest of the instant claims are very closely related to those claims of the co-pending application. Therefore, it would have been obvious to the skilled artisan in the art to be motivated to modify those claims of the co-pending application to narrow its limitation so as to accentuate the preferred embodiment for the claimed invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
